PROFESSIONAL PROFILE

Junior Software Developer building web applications for booking, inventory, and operational workflows using Python, PHP, C#, and SQL. Founder of ARS Tech Solutions, delivering custom solutions and IT support for small businesses. Warehouse background shapes user-focused design—I build systems people actually use.

PROFESSIONAL EXPERIENCE

ARS Tech Solutions – Founder, Web Developer & IT Support – Rolleston, Canterbury, New Zealand

2026 – Present

- Built responsive business websites and custom web applications for small-business clients, including booking systems and inventory tools.
- Owned full project lifecycle: requirements gathering, UI design, full-stack development, hosting setup, deployment, and client training.
- Provided PC, network, and printer setup and troubleshooting for small-business clients, translating technical issues into clear next steps.

Lanocorp Ltd – Warehouse Assistant – Canterbury, New Zealand

2022 – Present

- Maintained accurate inventory and shipping records across receiving, picking, packing, and dispatch—experience that directly informed the design of KISS-Web inventory system.

TECHNICAL SKILLS

Programming: Python, PHP, C#, C++, JavaScript, SQL, HTML5, CSS3

Frameworks and Web: Flask, ASP.NET Core Razor Pages, Jinja2, SQLAlchemy, Bootstrap

Databases and Tools: MySQL, SQLite, Git, GitHub, Visual Studio, VS Code, XAMPP, Trello, Microsoft Excel

IT Support: Windows 10/11, PC assembly and upgrades, OS and driver installation, LAN, Wi-Fi and printer troubleshooting, AnyDesk, TeamViewer

EDUCATION & CERTIFICATIONS

Diploma in Software Development (Level 6)

2025 – Present | Expected 2026

Yoobee College of Creative Innovation

Certificate in Information Technology (Level 5)

Completed Dec 2024

Yoobee College of Creative Innovation

Computer Systems Servicing NC II

2020

TESDA / Next Generation Technological College, Philippines

Bachelor of Science in Mathematics, Major in Computer Science

Bulacan State University, Philippines | Undergraduate study

PROJECTS

KISS-Web Inventory & Order Management System

PHP, MySQL, HTML, CSS, JavaScript, Bootstrap, GitHub

- Built a responsive warehouse system handling products, pallets, locations, inventory movements, and order tracking—designed from a real warehouse workflow at Lanocorp.
- Implemented role-based access, status workflows, low-stock alerts, audit logs, and CSV/Excel import-export for multi-user environments.

Noble InnSync - Hotel Booking & Operations Platform

Python, Flask, SQLAlchemy, SQLite, Jinja2, HTML, CSS, JavaScript, GitHub

- Co-developed full booking lifecycle: online and walk-in reservations, room allocation, payment processing, inventory tracking, issue reporting, and management dashboards.
- Built smart room allocation logic, role-based authentication, maintenance workflows, and automated validation checks across the platform.

Aotearoa Treasures - Inventory Management System

C++, SQLite, Visual Studio, Git and GitHub

- Developed database integration, authentication, and reporting for a multi-branch inventory and point-of-sale desktop application.
- Supported stock control, employee roles, rosters, and sales reports while collaborating in a Scrum team using Git and GitHub.

ADDITIONAL STRENGTHS

- Practical problem-solving and troubleshooting across software, hardware, and operational workflows.
- Clear communication with technical and non-technical users, with a strong focus on useful documentation.
- Reliable team contributor with experience working independently and in collaborative project environments.
